

Business Challenge:

International Shipping is a Complicated Process

The complexity of shipping goods internationally has grown exponentially making it difficult for shippers to keep pace. And, fines and penalties for non-compliance with government regulations and security protocols are significant. Efforts to manage the process internally are costly and present challenges because companies lack the internal resources, systems, and technology to effectively manage all the moving pieces.

Solution: Outsource with ChemLogix

ChemLogix has the global logistics expertise and technological tools to help companies manage their international shipping and reduce risks. We have developed a comprehensive suite of industry leading, international supply chain management solutions—which can be tailored to your company's specific needs.

The ChemLogix Global Trade Management System combines web-based technology with global content to effectively and proactively manage your Logistics Service Provider network.

ChemLogix also offers an experienced staff with access to sophisticated diagnostic tools for identifying key performance indicators, evaluating process efficiency, managing route guide compliance, inventory levels, carrier rate competitiveness and more.

Typical consequences of an inefficient international supply chain include:

- Fines and penalties due to non-compliance
- Excessive landed costs
- Overbilling by carriers
- Lengthy event cycle times
- Non-optimal inventory levels
- Increased utilization of expensive air freight
- Inaccurate cost accruals and more
- Loss of import/export privileges

Benefits: Process Improvement & Cost Savings

Utilizing ChemLogix' best in breed International Supply Chain Management Solutions will yield tangible results for your organization including:

- Process automation
- Improved regulatory and security program compliance
- Reduced expenses through implementation of cost controls and day-to-day management of multiple freight forwarders and ocean freight contracts
- Improved inventory levels and cash flow
- Optimized supply chain event cycles
- Increased supply chain visibility

Is Your Company Compliant?

Find out. Continue to the next page to take our Compliance Litmus Test.

Is Your Company Compliant?

Take our “Compliance Litmus Test”

Due to the complexities and rapidly changing nature of government import/export regulations, companies are often surprised to learn that they are non-compliant. Unfortunately, the consequences for non-compliance can be harsh, including jail terms, criminal fines and the denial of export privileges—not to mention the negative impact that non-compliance can have on both business and personal reputations. To determine if your organization is in compliance, start by answering the following questions:

1. Are your products classified in accordance with U.S. Customs rules and regulations?

Yes () No ()

2. Have you conducted a pre-audit of your regulatory compliance process?

Yes () No ()

3. Is your company aware of and complying with all newly enacted import security requirements?

Yes () No ()

4. Is your company up to date with current duty management strategies allowing for legal reductions of duty payment and other Customs costs?

Yes () No ()

5. Is your Route Guide compliance measured, reported and enforced to ensure that exceptions are rare and necessary?

Yes () No ()

If you answered “No” or are unsure how to answer any of the questions above, your company may be at risk. ChemLogix can help you manage your compliance programs and eliminate the risk of fines, administrative penalties and loss of export privileges. Contact us for more information at: (215) 461-3800, or visit us online www.ChemLogix.com.
