

Gain competitive advantage with On-Demand Global TMS

On-Demand Global TMS streamlines your operation at every stage, while delivering rapid ROI.

At every point along the supply chain, a multitude of logistical challenges confront shippers, including capacity shortages, antiquated billing systems, carrier rate increases and more. These issues can lead to operational inefficiencies, inflated costs, and revenue drain.

While these obstacles can affect all companies of all sizes, small and mid-sized chemical companies typically feel the impact to a greater degree, as few possess the resources to mitigate these circumstances.

To gain competitive advantage, companies across the globe are turning to CLX Logistics' On-Demand Global Transportation Management System (TMS). Developed in partnership with IBM, our TMS offers a comprehensive menu of services which enable shippers to eliminate operational inefficiencies. By providing control and visibility, and affording rapid return on investment, CLX Logistics' On-Demand Global TMS levels the playing field for small and mid-sized companies.

What Is On-Demand Global TMS?

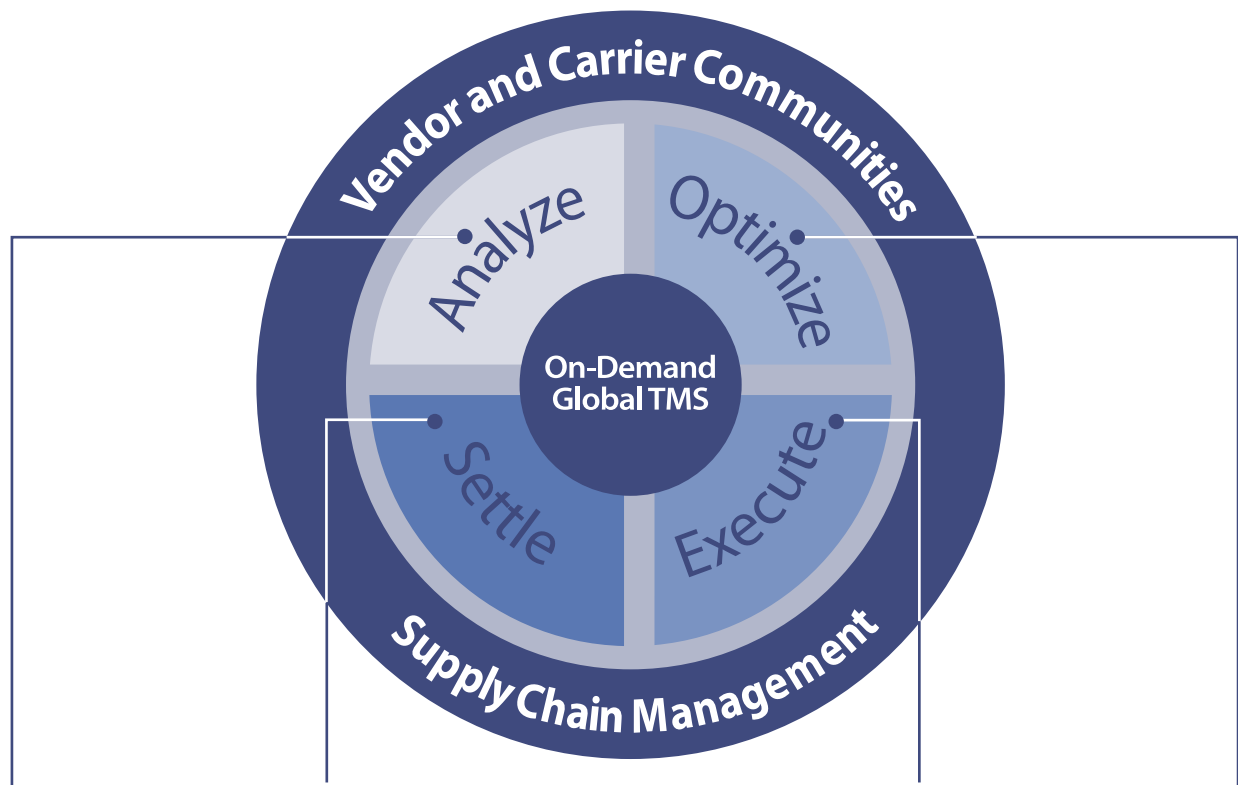

CLX Logistics' Transportation Management Solution ("On-Demand Global TMS") is a web-based, fully customizable system that provides immediate, "at-your-fingertips" access to your logistics network.

Backed by CLX Logistics' proven track record of world class logistics performance and industry best practices, the On-Demand TMS is powered by IBM's best-of-breed transportation management software. On-Demand Global TMS places control back in your hands by

optimizing daily routes, rates and services levels, providing real-time visibility into transportation status, and automating freight payments.

Regardless of shipment size, frequency, end destination or product type, CLX Logistics' On-Demand Global TMS can help transform standard operating costs into major savings, empowering your business to achieve significant competitive advantage, across all modes of transportation.

Complete TMS Footprint – Inbound/Outbound

Analyze

On-Demand Global TMS utilizes IBM technology to provide a web-based, fully customizable system that offers immediate, “at-your-fingertips” access to your logistics network.

What Can On-Demand Global TMS Do For You?

With CLX Logistics' On-Demand Global TMS you no longer have to contend with outdated and inefficient systems, lack of control over expenses and deficiencies in visibility and access. Powered by IBM's best-of-breed transportation management software, and personalized for your needs and circumstances, the On-Demand Global TMS delivers immediate operational benefits as well as rapid return on investment.

- Freight cost savings of 5–12%
- ROI in as little as 1–3 months from launch
- Savings of 6–15% on inbound sourcing and tendering
- Improved employee productivity through automation
- Streamlined freight bill audit and settlement (1–5% savings)
- Smaller IT footprint with “cloud” technology
- Control and visibility of freight costs not available in ERP
- Access to carriers in difficult capacity areas
