

CLX LOGISTICS

INNOVATION THROUGH PEOPLE, PROCESS AND TECHNOLOGY

How Can I Achieve Chemical Logistics Compliance Quickly & Effectively?

Global chemical supply chain logistics is complicated, but can be made easier with the right tools and guidance from a 4PL. ChemLogix from CLX Logistics makes it easy to monitor and act on rapidly changing import and export regulations to maintain compliance and avoid fines, criminal charges, export privilege revocation, and the negative impact that non-compliance can have on your company's reputation.

ChemLogix Answers Your Most Pressing Chemical Logistics Compliance Questions

How do I ensure my products are properly classified?

ChemLogix automatically updates with the latest US customs and international regulatory and security compliance protocols, so that there's never any question about the legality of your transportation supply chain.

How do I minimize duty payments and other customs costs?

ChemLogix uses the latest information to help you strategize and optimize transportation routes around the globe to reduce spend and ensure you're not paying more than your competitors.

How do I get a complete overview of my route compliance?

ChemLogix provides powerful measuring and reporting tools to ensure compliance among all your carriers and partners at every step of the way. In the rare event that an exception in your supply chain must be made, ChemLogix keeps you organized with clear tracking and recording.

How do I know if my compliance process is correct?

With ChemLogix, CLX Logistics can conduct a pre-audit of your regulatory compliance process so that any issues of non-compliance can be immediately addressed before any further changes are implemented into your supply chain.

How do I stay up to date on the latest import security requirements?

ChemLogix takes in a constant stream of data so there are no surprises, and supply chain changes can be made well in advance, avoiding unnecessary penalties, fees, and delays.

ChemLogix makes managing compliance among every mode of your chemical logistics program easy. Save time, save money, and eliminate unnecessary risk. Contact CLX Logistics today to get started.
